PROFESSIONAL SUMMARY

Results-driven Computer Science student specializing in Software Development and Data Analysis, with hands-on experience building scalable REST APIs, full-stack web applications, and AI-powered real-time systems using Java, Spring Boot, React.js, and MySQL. Proficient in data visualization using Power BI and Excel. Demonstrated ability to apply OOP, data structures, and algorithms to solve complex engineering problems (50+ LeetCode solutions). Seeking SDE or Data Analyst roles to contribute to high-impact engineering teams.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL

Frontend: React.js, HTML5, CSS3, Figma

Backend & APIs: Spring Boot, REST APIs, Microservices

Databases: MySQL, CRUD Operations, Database Design

Data & Analytics: Power BI, Microsoft Excel, Data Visualization, Dashboard Design

CS Fundamentals: Data Structures, Algorithms, Object-Oriented Programming (OOP)

Tools : Git, GitHub

PROJECTS

Employee Attendance Management System / *Java • Spring Boot • React.js • MySQL • REST API* | Full-Stack Developer | 2024

- Architected and developed a full-stack attendance management system using Spring Boot (backend) and React.js (frontend), following RESTful API design principles and MVC architecture.
- Designed and implemented 10+ REST API endpoints for employee registration, attendance tracking, and leave management, reducing data retrieval time by ~40%.
- Integrated MySQL relational database with optimized schema for secure, structured data storage supporting concurrent multi-user access.
- Automated monthly attendance report generation, eliminating 100% of manual reporting effort and improving data accuracy.
- Built a fully responsive UI using React.js and CSS, enhancing usability across desktop and mobile devices.

AI-Based Crowd Control & Monitoring System / *Python • YOLO • Real-Time Analytics • UI/UX* | UI/UX Developer & Analyst | 2024

- Designed and developed an interactive real-time dashboard UI for an AI-powered crowd monitoring system, improving operator situational awareness.
- Integrated YOLO object detection model for real-time human detection and count estimation with frame-by-frame analysis.
- Implemented threshold-based occupancy tracking and automated entry control logic, enabling proactive crowd management decisions.
- Built real-time data visualization dashboards displaying live occupancy metrics, alert thresholds, and trend analytics.

EDUCATION

B.E. Computer Science and Design — GPA: 8.25 / 10.0

Sri Krishna College of Engineering and Technology, Coimbatore

Higher Secondary (Grade 12) — 92% | St. Mary's Matriculation Hr. Sec. School

CERTIFICATIONS & ACHIEVEMENTS

- DSA using Java Certification — Strengthened proficiency in core data structures (arrays, trees, graphs, heaps) and algorithmic problem-solving.
- AI Works Certification — Gained foundational knowledge in AI/ML concepts, model integration, and real-world AI application design.
- Solved 50+ DSA problems on LeetCode — Consistently practicing medium-difficulty problems (arrays, strings, DP, graphs).
- Self-learned Java, Spring Boot, React.js, Power BI, and Excel through independent study and project-based learning.
